MAP Policies Compliance System

Automated price monitoring, violation detection, and enforcement across marketplaces — protecting brand value and fair competition.

PROJECT REPORT

Made with GAMMA

The Problem: Price Erosion

What's at Stake

Resellers advertising below MAP erode brand value and disrupt fair competition.

Brand Damage

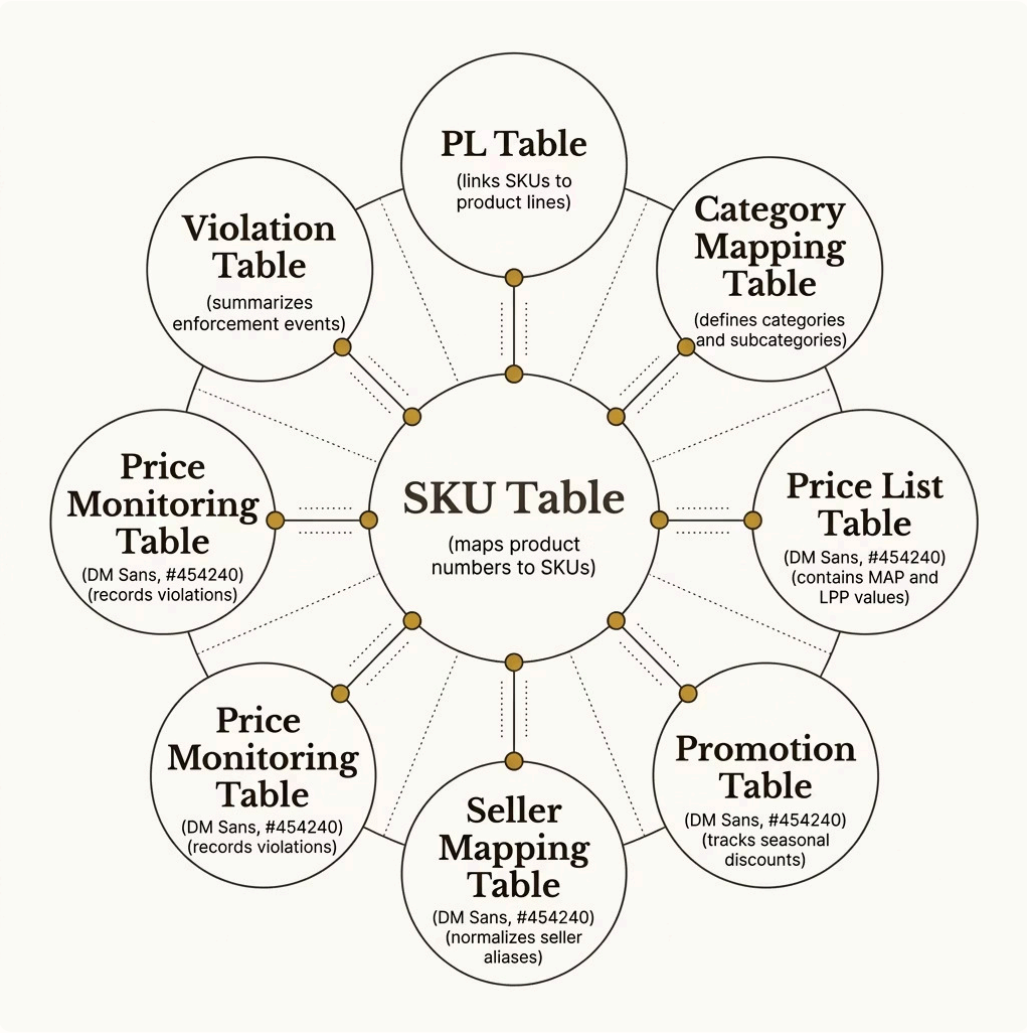
Undercutting distorts perceived product value

Unfair Competition

Honest resellers lose ground to violators

Made with GAMMA

System Architecture: 8 Core Tables



A Unified Data Model

Each table plays a defined role — from product identification to enforcement — forming a complete compliance workflow.

Seller aliases are normalized: **"Cocoblu Retail" → "Dell Technologies"**

Made with GAMMA

Five-Stage Enforcement Workflow

Monitor

Collect advertised prices from marketplaces

Detect

Compare against MAP and LPP thresholds

Map Seller

Normalize aliases to homologated names

Adjust Promotions

Factor in seasonal discounts before flagging

Enforce

Issue warnings or suspend categories

Made with GAMMA

Violation Detection Logic

How Violations Are Flagged

Advertised prices are checked against two thresholds:

MAP

Minimum Advertised Price — the floor for all listings

LPP

Lowest Permitted Price — quarterly adjusted threshold

Rule: If Advertised Price < LPP → violation recorded

Made with GAMMA

Real Case: SKU G0L15B

9,900

MAP Price

Minimum advertised threshold

8,910

LPP (Q1)

Lowest permitted price

9,500

Advertised

Price on Amazon.com

Violation Details

- **Seller:** Cocoblu Retail → Dell Technologies
- **Marketplace:** Amazon.com
- **Date:** November 15, 2025
- **Reason:** Price < LPP

Action Taken

⚠️ Warning Letter

Issued to Dell Technologies

Made with GAMMA

Enforcement Actions

First Violation

Automated warning letter issued to the homologated seller entity

Repeat Violation

Category suspension enforced for the reseller

All actions are logged in the **Violation Table** for audit and reporting.

Made with GAMMA

Why It Matters: Key Benefits

Brand Protection

Prevents price erosion and maintains perceived product value across channels

Fair Competition

Resellers compete on service quality, not on undercutting prices

Full Automation

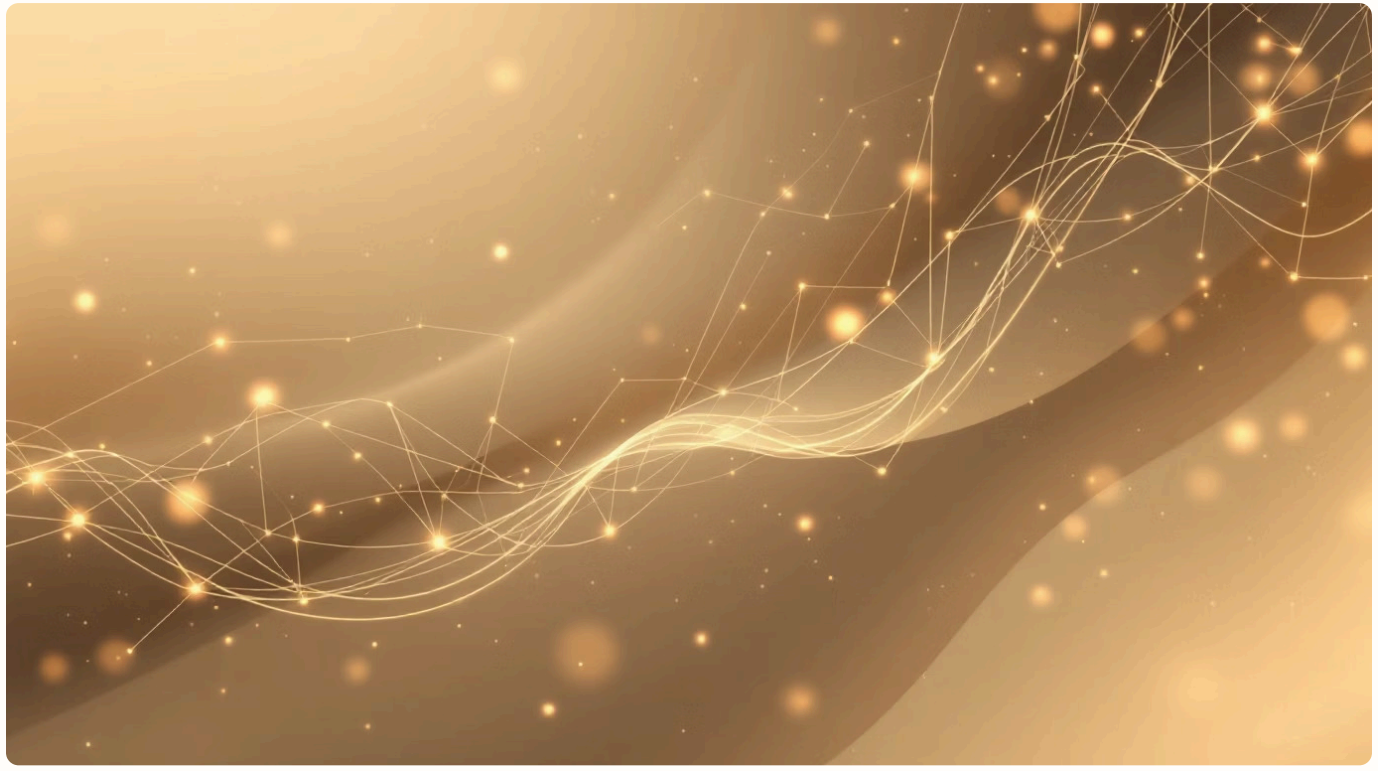
Eliminates manual monitoring — detection, mapping, and alerts run end-to-end

Scalability

Supports multiple marketplaces and resolves seller aliases at scale

Made with GAMMA

System at a Glance



Unified Compliance Workflow

Pricing data, seller mapping, and violation tracking converge into a single automated enforcement engine.

Detect

Real-time price monitoring across marketplaces

Map

Normalize seller identities for accurate enforcement

Enforce

Automated warnings and suspensions protect brand integrity

Made with GAMMA

Conclusion

> The MAP Compliance System safeguards brand integrity, ensures reseller accountability, and maintains a stable, fair market environment — automatically.

Monitor

Continuous price tracking

Detect

Automated violation flagging

Enforce

Warnings & suspensions

Made with GAMMA
